## **DETAILED ACTION**

### ***Specification***

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is no support for the materials of the substrate and the foam components to have different hardnesses.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al. '678.

Brown et al. disclose the claimed invention including rigid substrate 18 and foam countermeasures 13-15 that "may be energy absorptive" (paragraph 22, line 2). The substrate and the foam countermeasures being formed of different materials and being integrally molded together. As pointed out by Applicant in the remarks of 11/11/05, an energy absorption capacity of a foam means that it "is relatively soft so that it may

compress or flex in the event that a vehicle occupant contacts the headliner”.

Therefore, the material of the foam countermeasures is inherently less hard when compared to the hardness of the rigid substrate.

Brown et al. also disclose rails 13, 14, a cross member 15 and aperture 86 for a headliner component with this aperture being formed on a mid bar 84 which is included in foam member 14 (see paragraph 32 lines 1-3).

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1-3 and 13 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

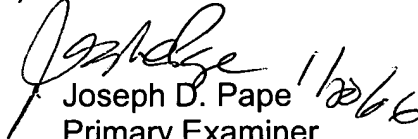

Art Unit: 3612

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
